VI. Presentations

- a. **Battery Powered Equipment – Jessie Rust**
 - i. Chris Brindley: In the past, you all have been absolutely amazing on supporting grounds initiatives. Jessie is one of the front runner of wanting more sustainability on campus. With what we have already, people have loved using, so we need to replace some equipment and add on.
 - ii. Jessie Rust: we have 16+ student staff. Have had similar equipment in the past which has been great with no oil or gas used, so no emissions. They're quiet, easy to start. We have been researching what will last us longer. Milwaukee Tool

equipment is good quality and will last longer. The other advantage is it is a Wisconsin based company and they have a great website with their sustainability efforts. They have plans to continue to cut their emissions, limit and improve packaging, and have a battery recycling program.

VII. Deliberations

a. Additional Compost Bins

i. Move to approve in the amount of \$284.60

- **Koppedryer:** good initiative for campus and a relatively low cost to set that example
- **Cronce:** they presented, so let's discuss
- **Koppedryer:** is there a cap on how much funds we can allocate?
- **Authement:** the Green Fund does have a certain amount in it, but with ViewPoint neutrality, we cannot take that into consideration. The account will be okay! Good question.
